Impact of Brexit on UK copyright law

This short briefing assesses the possible impact that the withdrawal of the United Kingdom from the European Union will have on UK copyright law, focusing on the provisions of the Copyright Designs and Patents Act 1988 as amended\(^1\) (the CDPA). This discussion is, of course, subject to the contents of the "Great Repeal Bill" (a bill that will repeal the European Communities Act 1972\(^2\) and immediately re-enact much or all of the content of EU law into domestic law)\(^3\) and future free-trade agreements, which at this point in time are unknown.

This note is intended merely to set out some of the areas where the Government will become free to make changes once the UK ceases to be bound by EU law, in order to aid debate and policy-making. It does not advocate any particular position on those issues.

Summary

The withdrawal from the European Union will not require the UK to change its copyright law, but it might choose to do so once it is no longer bound by the harmonised parameters of the EU copyright "acquis". However, even when the UK is no longer bound by EU law, the UK will still need to adhere to the internationally agreed protection standards, such as the Berne Three-Step Test\(^4\), as the UK itself is a member of the WIPO Internet Treaties 1996\(^5\) (dual membership with the European Union), a member of WTO (TRIPS)\(^6\) since 1995 and the Berne Convention 1886\(^7\). Generally, the UK will therefore need to continue to maintain a high level of protection for copyright works, but without the requirement to adhere to the EU copyright framework it will be possible for the UK to change the semantics of current detailed provisions. Given the number of copyright reviews in recent years (in particular by Gowers and Hargreaves) followed by substantial changes in 2014 it is not expected that the UK will take advantage of the new-found flexibility and introduce new exceptions that arguably

were prevented by EU copyright law, such as a private copying exception without fair compensation\(^8\) or a more general copyright exception of fair use.

As regards tariffs, even in the absence of a free-trade agreement or any form of customs union, copyright licensing seems not to be subject to tariffs under the WTO trade rules. The same applies for physical products incorporating copyright works such as CDs or DVDs.\(^9\) Nevertheless, given the scope and extent of the negotiations that need to be had between the UK, the EU and other countries, it is likely that changes to UK copyright law will not feature highly on the agenda of UK policymakers and it will remain to be seen whether, and to what extent, copyright will be addressed in future free-trade agreements.

One of the more difficult points we have had to address is that of the reciprocity gap between the UK and EU countries which may emerge via the Great Repeal Bill and which might leave UK-based media businesses at a significant competitive disadvantage to their EU counterparts. This is likely to be a key focus for media businesses in their engagement with government in the short to medium term.

Also, there is uncertainty regarding how the expected Great Repeal Bill will cover decisions of the CJEU, both those that have been directly applied in UK decisions\(^10\) or those where the reference originated from a Court in another member state\(^11\). A further question expected to be covered in the Great Repeal Bill relates to jurisdiction, governing law and recognition and enforcement of judgements in cross border disputes. Whilst this is relevant for the practical application of copyright via contracts and enforcement, it is not directly related to copyright legislation\(^12\).

Detail

I. Subject matter copyright

The UK copyright system, based on a closed list of protected works that are subject to an originality threshold\(^{13}\), will not change. It is based on pre-EU UK copyright law (the 1911 Act\(^{14}\)) and it is unlikely that the withdrawal from the EU will justify any changes to this system. With regards the legal test to determinate ‘originality’, we note that the UK is converging its perspective with the European Union. For example, the EU concept of “author's own intellectual creation”\(^{15}\) was applied in, amongst others, the UK case SAS Institute Inc. v World Programming Ltd\(^{16}\). But, notwithstanding the evaluation of CJEU decisions in future, we would argue that in this instance such a convergence has become part of the UK jurisdiction and as such it is expected that upon Brexit both concepts, the EU test of “author's own intellectual creation” and the UK test of “skill labour and judgement”\(^{17}\) will continue to apply when assessing the subsistence of copyright.

Within the UK system, copyright protection will continue to apply for databases, however the sui generis right (s.3A CDPA based on the EU Database Directive\(^{18}\)) could be amended after Brexit if there were political will to do so.

The scope of s.6A CDPA (safeguards in case of certain satellite broadcasts) will have to be changed as it currently refers to the European Economic Area. However, it is noteworthy that a broader solution needs to be found for pan-European satellite broadcasts in order to facilitate the licensing process. We note the existence of the proposed Regulation \(^{19}\) on satellite and cable (re)transmissions, however it is clear that cable and satellite transmissions are an

\(^{19}\) Proposal for a Regulation of the European Parliament and of the Council laying down rules on the exercise of copyright and related rights applicable to certain online transmissions of broadcasting organisations and retransmissions of television and radio programmes COM(2016) 594
area which the UK government will have to address following the withdrawal from the European Union.

In contrast, the European Agreement for the Prevention of Broadcasts transmitted from Stations outside National Territories 1967\(^{20}\) only deals with ships and other floating vessels and might not require a change after the withdrawal from the European Union.

II. Term

The term of copyright is required to be 70 years after the death of the author\(^ {21}\) at European level, however the international treaties only provide for minimum term of 50 years after the death of the author\(^ {22}\). Therefore, following the withdrawal from the European Union, the UK would no longer be bound to 70 years from the death of the author as the term of copyright. Similarly, the term for performers and phonogram producers which has been increased in the amended Term Directive\(^ {23}\) would no longer be mandatory; the internationally binding WIPO Performances and Phonograms Treaty of 1996 provides for a minimum term of 50 years from the fixation of the performance\(^ {24}\). UK Government could choose to revert to the minimum requirements required by international agreements.

Similarly, the UK could decide to vary s.10A regarding the calculation of term for works of co-authorship and s.66A CDPA regarding the term of copyright for films (reflected in the exception on assumptions as to expiry of copyright) as both were enacted via EU Directives\(^ {25}\) and therefore could be varied after the UK leaves the EU, subject to the political decision of the government.

III. Acts restricted by copyright

UK copyright law provides for the right to or authorise someone else to\(^ {26}\):

- Copy the work;
- Communicate the work to the public (e.g. via radio or internet);

\( ^{20}\) European Agreement for the Prevention of Broadcasts transmitted from Stations outside National Territories
\( ^{21}\) Article 1, the Term Directive
\( ^{22}\) Article 7, The Berne Convention
\( ^{23}\) amended Term Directive 2011/77/EU
\( ^{24}\) Article 17 WIPO Performances and Phonograms Treaty
\( ^{26}\) S.16 Copyright, Designs and Patents Act 1988
• Make an adaptation of the work;
• Perform, show or play the work in public;
• Issue copies of the work to the public; and
• Rent or lend the work to the public.

The acts restricted by copyright have been harmonised at EU level in various Directives; most notably the rights of reproduction\textsuperscript{27}, communication to the public\textsuperscript{28}, distribution\textsuperscript{29}, and rental and lending\textsuperscript{30}. Whilst some of the details of the rights at UK level are based on the implementation of the respective Directives, the rights in their current form are also part of the international copyright framework, in particular the WIPO Internet Treaties 1996\textsuperscript{31} and the Berne Convention 1886\textsuperscript{32}. Therefore, whilst the semantics of UK legislation could be changed, the government cannot remove the rights themselves. For example the UK government decided to implement the ‘communication to the public’ right in Sections 18 and 20 CDPA based on the wording of Recital 23 of the Information Society Directive\textsuperscript{33}; post-Brexit, the detail of the ‘communication to the public right’ could be changed based on the WIPO Copyright Treaty\textsuperscript{35}, but the right itself needs to be provided.

The exhaustion rule in s.18 CDPA is another example of a provision which currently refers to the European Economic Area and as such may need to be amended when the UK leaves the European Union. It will be open to the UK government to decide whether the scope of exhaustion rules should remain the EEA, reduce to the UK, or opt for an international exhaustion rule as applied by Switzerland and the US.\textsuperscript{36}

\end{itemize}
IV. Exceptions

Withdrawal from the European Union enables the UK government to legislate in the area of copyright exceptions without having to comply with the parameters established by the European Directives. By way of example, the UK government could, theoretically, introduce an exception for private copying without fair compensation (which failed in 2014 in view of the parameters of Article 5(2b) Information Society Directive\textsuperscript{37}), or a general fair use style exception, which Prof Hargreaves in his review of copyright in 2011\textsuperscript{38} stated was impossible to introduce in UK law given the current constraints of EU copyright law.

The existing EU copyright framework only provides one mandatory exception for temporary copies\textsuperscript{39} whilst the other exceptions are optional. The parameters under which member states can choose to implement any of their exceptions are provided for in articles 5(2) and 5(3) Information Society Directive\textsuperscript{40}. We note that the proposed Directive on Copyright in the Digital Single Market\textsuperscript{41} provides for three additional mandatory exceptions (text and data mining, educational establishments, and cultural preservation) which might be implemented by the UK government.

Following the review of intellectual property by Prof Hargreaves\textsuperscript{42}, the UK has chosen to implement all optional exceptions provided in the Information Society Directive\textsuperscript{43}; thus, it is unlikely that the UK government will choose to limit the exceptions after the withdrawal from the European Union.

Whilst exceptions for the benefit of visually impaired people are based on the Information Society Directive\textsuperscript{44}, it is worth noting that the UK will have to include

\textsuperscript{37} The Copyright and Rights in Performances (Personal Copies for Private use) Regulations 2014 were quashed after judicial review.
\textsuperscript{38} Digital Opportunity, A Review of Intellectual Property and Growth, May 2011

\textsuperscript{40} Article 5(2) and 5(3), the Information Society Directive
\textsuperscript{42} The Hargreaves Review of Intellectual Property and Growth, Exploring the Flexibilities Available to UK Law
\textsuperscript{43} The Information Society Directive
\textsuperscript{44} Article 5(3)(b), the Information Society Directive, from which the UK enacted The Copyright and Rights in Performances (Disability) Regulations 2014
such an exception once it ratifies the WIPO Marrakesh Treaty\textsuperscript{45} notwithstanding European Union membership (see section XI for more detail).

Notably, even after withdrawal the UK government has to comply with the internationally binding Berne Three Step Test\textsuperscript{46} as enshrined in the TRIPS agreement 1994\textsuperscript{47}.

In the area of software, sections 50A to 50C CDPA are based on the Software Directive\textsuperscript{48}; they could be amended following the withdrawal from the European Union. It is not quite clear what the impact on section 50D CDPA would be (concerning acts permitted in relation to databases).

An interesting point arises regarding section 52 CDPA, which was (belatedly) repealed by the UK in the light of a CJEU decision in 2011\textsuperscript{49}. Whether the repeal can be reversed depends on the approach of UK government towards CJEU decisions and whether their effect (in particular decisions on non-UK references) can be retrospectively downgraded. However, this is unlikely.

Section 72 CDPA has been changed (“films” have been removed from its scope) in view of a decision of the CJEU\textsuperscript{50}. Whilst in theory this change could be varied at UK level following the withdrawal from the European Union, this is unlikely.

Section 73 CDPA\textsuperscript{51} providing for an exception for the reception and re-transmission of wireless broadcast by cable seems to have been based on the Satellite and Cable Directive\textsuperscript{52}; following the withdrawal from the European Union, this section could be varied if there is a political will to do so. Interestingly, Section 73 does not refer to the European Economic Area.

\textsuperscript{45} Marrakesh Treaty to Facilitate Access to Published Works for Persons Who Are Blind, Visually Impaired or Otherwise Print Disabled, 2013.
\textsuperscript{46} A test relating to exclusive rights of reproduction, originating from Article 9(2) of 1967 revision of The Berne Convention

\textsuperscript{49} Flos SpA v Semeraro Casa e Famiglia SpA Case C-168/09 Judgment of the Court (Second Chamber) of 27 January 2011
\textsuperscript{50} Joined Cases Football Association Premier League Ltd and Others v QC Leisure and Others (C-403/08) and Karen Murphy v Media Protection Services Ltd (C-429/08) JUDGMENT OF THE COURT (Grand Chamber) 4 October 2011
\textsuperscript{51} Note s.73 CDPA is in the process of being repealed by the government, a move that is welcomed by BCC.
The existing exceptions have been found to comply with the international Berne three-step test.

The approach towards orphan works is based on the European Orphan Works Directive\(^{53}\); the UK government could decide to vary the relevant section 76A in the CDPA if they choose to do so; this is highly unlikely given that UK government considered a licensing based approach to orphan works even before the Orphan Works Directive was adopted.

As previously emphasised, whilst such changes would be legally possible following the withdrawal from the European Union, it is unlikely that changes to copyright feature on the top of the agenda of government.

V. Dealings with Rights in Copyright Work

Sections 93A to 93C CDPA are based on the EU Directive concerning rental and lending rights\(^{54}\) and could be amended following the withdrawal from the European Union.

VI. Remedies

Section 97A CDPA is the implementation of Article 8(3) Information Society Directive\(^{55}\) and could be varied after withdrawal from the European Union, however, as was argued by the UK government during the implementation of the Information Society Directive, website blocking orders were already available under existing UK civil law\(^{56}\). Note also the Court of Appeal’s decision in the Cartier/ Richemont case\(^{57}\).

VII. Collective Rights Management

Sections 116 CDPA onwards have been amended through the Collective Management of Copyright (EU Directive) Regulations 2016\(^{58}\). These regulations are stand-alone and could be varied by the UK government however they underpin an important voluntary system in which the UK CMOs set the standard. It remains to be seen how the withdrawal from the European Union impacts

specifically the implementation of Title Three of the Collective Rights Management Directive\textsuperscript{59} on multi-territorial licensing in view of the on-going voluntary activities of CMOs enabling cross border licensing\textsuperscript{60}

\section*{VIII. Reciprocity Gap}

There are a number of areas of media law and regulation where a simple Great Repeal Bill would have the unintended consequence of creating a reciprocity gap, to the likely disadvantage of UK media businesses. The reason is as follows:

\begin{itemize}
\item A number of EU directives and regulations create systems of mutuality or reciprocity whereby, for example, a clearance obtained in one EU member state is valid for the whole of the EU.
\item Post-Brexit, a clearance obtained in, say, France would have to be recognised as valid in the UK, because the Great Repeal Bill would have the effect that the UK will continue to follow the rule applicable to the rest of the EU.
\item But the opposite would no longer be true; a UK clearance would on the face of it no longer be good in France, because the EU rule only requires France to accept clearances obtained in other EU member states.
\item So, if passed in the form suggested, in the absence of trade agreements, the Great Repeal Bill would likely penalise UK-based media businesses and operate as a direct disincentive for them to establish themselves (or remain) in the UK.
\end{itemize}

More detail on this and the potential (albeit cumbersome) solution can be found in Phil Sherrell's article on this subject\textsuperscript{61}

\begin{footnotesize}

\textsuperscript{61} \textit{Brexit and the Reciprocity Gap}, Phil Sherrell, Bird & Bird LLP
\end{footnotesize}
IX. Performers’ Rights

Performers’ specific provisions in sections 182-184 CDPA and 191 onwards are based on the WIPO Performances and Phonograms Treaty 1996\(^2\) (subsequently adopted as a Community Treaty).

X. Technological Protection Measures

The UK will have some flexibility to vary Sections 296ZA onwards (currently based on the Information Society Directive\(^3\)). Again, WIPO Internet Treaties\(^4\) require Technological Protection Measures but the detail can be changed beyond minimum harmonisation.

XI. Marrakesh Treaty to Facilitate Access to Published Works for Persons Who Are Blind, Visually Impaired, or Otherwise Print Disabled

The impact of the implementation in the European Union of the proposed Directive\(^5\) and Regulation\(^6\) on certain permitted uses of works for the benefit of persons who are blind, visually impaired, or otherwise print disabled will be limited.

The exception of printing accessible copies for disabled persons under Sections 31A – 31F CDPA already complies with the Marrakesh Treaty\(^7\) notwithstanding the existence of a European Union Directive. No changes are required and are probably also not possible once the UK ratifies the Marrakesh Treaty (independent of whether the UK ratifies as part of the European Union or as an independent state outside the EU; once the withdrawal has happened the UK has

\(^2\) WIPO Performances and Phonograms Treaty 1996 enacted in the UK through The Performances (Moral Rights, etc.) Regulations 2006 (S.I. 2006/18)

\(^3\) Article 6 the Information Society Directive

\(^4\) The WIPO Copyright Treaty 1996 and the WIPO Performances and Phonograms Treaty 1996 are together known as the “Internet Treaties”

\(^7\) Marrakesh Treaty to Facilitate Access to Published Works for Persons Who Are Blind, Visually Impaired or Otherwise Print Disabled, 2013.
to ratify by themselves because it is not covered by the EU ratification. Note, the UK has signed the other Treaties for other than the WIPO Audio-Visual Performances Treaty as themselves – dual membership). If outside the European Union, the UK does not have to comply with choices made by the European Union when implementing the Marrakesh Treaty, for example regarding the fact that “Member States should not be allowed to impose additional requirements for the application of the exception” (proposed Recital 11).

However, the part of the Directive regarding the exchange of accessible format copies refers to European Union Member States and will not be applicable to the UK once the withdrawal has occurred (unless this is specifically agreed; this is not required given that the UK has to provide a system of cross border exchange of accessible format copies under the Marrakesh Treaty once ratified).

As far as the Regulation is concerned, the UK will qualify as a third country when they ratify the Marrakesh Treaty and therefore European Member States will have to apply the standards of the Regulation when arranging the cross border exchange of accessible format copies with the UK. This will not impose any conditions on the UK itself (subject to an express agreement to the contrary regarding the application of the Regulation with the European Union). The exchange mechanism will nevertheless be based on the Marrakesh Treaty directly.
